PRACTICE MANAGEMENT HOT TIPS FOR IMPROVING PATIENT CARE

This lecture is a fast paced presentation to help doctors improve patient care and eliminate potential mistakes in practice. In almost one hour doctors will receive valuable information to improve the quality of their X-rays and accuracy of film analysis. This DVD helps encourage the doctor to improve their ability to provide detailed listings for patients that can be shared with other chiropractors in case of a referral to help ensure the most effective adjustment. Patient examination and outcome assessment procedures are covered as well as methods to help educate patients about specific upper cervical care. Of course some self-deprecating humor is included.

This video will cover the following issues:

- Safeguards that can be put in place to improve quality of cervical radiographs
- Methods that can be utilized to reduce the amount of exposure to patients from X-rays
- Procedures that the doctor can adopt to improve film analysis to more accurate measure the subluxation
- Documenting patient listings and other clinical aspects to help improve the application of care
- Protocol to help improve the accuracy and effectiveness of the upper cervical adjustment
- Reviewing examination procedures and outcome assessments to improve patient care
- Patient education tips to help inform them of the importance of subluxation-based chiropractic care

Full length DVD (~1 hour) can be purchased for $39
